

Felipe Bart

Business Transformation and Operating Model Design

Drogheda, Ireland | bart.pessoal@gmail.com | linkedin.com/in/felipebart

Professional profile

Business planning and transformation leader who diagnoses operational problems, redesigns processes and implements practical systems. Experience connects global planning, enterprise technology, governance, automation and capability building. Brings hands-on delivery experience to consulting mandates focused on changing how organisations work.

Core capabilities

Operating-model design • Process redesign • Requirements discovery • Stakeholder facilitation • Change enablement • Training • Decision governance • Analytics • Workflow automation

Professional experience

Valeo Foods | 2026 to present

Head of Demand Planning and S&OP Transformation

- Designed an integrated S&OP operating environment linking planning, governance, analytics, decisions, actions and escalations through Microsoft 365.
- Connected Teams, SharePoint, structured Lists, Power BI and Power Automate to support cross-functional collaboration and execution follow-through.
- Developed AI-assisted workflows for transcript-based meeting minutes, natural-language access to structured planning information and executive synthesis.
- Facilitate cross-functional planning and executive decision forums, connecting assumptions, risks and ownership to a recurring operating cadence.

The Coca-Cola Company | 2024 to 2026

Demand Planning Analyst with global market scope

- Supported planning across approximately 50 international markets, combining forecasting analysis with cross-functional Demand Review and commercial assumptions.
- Developed planning analytics and automation to improve the consistency of information and focus stakeholder discussions on decisions and exceptions.
- Delivered planning training and capability building across international teams, translating analytical methods into practical ways of working.

WaterWipes | 2021 to 2024

Senior Global Supply Planner

- Progressed through supply chain analyst and planner/buyer roles into senior global supply planning.
- Built an Excel planning environment that extended visibility from short-term tactical planning toward a year of demand, supply, capacity and inventory scenarios.
- Contributed business-process design, implementation activities and training for SAP S/4HANA and SAP IBP, connecting system deployment with operational adoption.
- Applied inventory segmentation and planning policy improvements to support working-capital optimisation; contributed to US 3PL consolidation.

Aristospray | 2020 to 2021

Purchasing and inventory management

- Redesigned physical inventory counting using Google Sheets and scripting, with structured inputs, location logic, live validation and exception-led recounts.
- Reduced a stocktake process from approximately three working days to around three hours, restoring operating capacity and establishing a path toward perpetual counting.
- Used purchasing and inventory analysis to improve stock policies and operational decision-making.

Votorantim Cimentos | 2015 to 2019

Supply planning and purchasing

- Worked across a multi-site industrial environment, supporting supply planning, procurement analysis and inventory decisions.
- Supported purchasing activity with an annual transactional budget of approximately €4.2 million across 24 plants and contributed to large-scale data and system conversion.

Earlier experience

Commercial analysis and business support roles at Nutrimental, Cini Bebidas and Ometz Group, 2009 to 2014.

Education and tools

Business Administration degree, IEL, 2017. Project Management QQI Level 6, 2021. Portuguese and English.

SAP S/4HANA and SAP IBP business processes; Excel; Power BI; Power Automate; SharePoint; Teams; Microsoft Lists; Copilot; Google Sheets and Apps Script.
